Cultivated game fish lists closed to further claims April 2015							

TROUT (Rainbow) (*Oncorhynchus mykiss*) The previous cultivated record of 36lbs 14oz 8 drms caught in 1995 at Dever Springs Trout Fishery, and claimed by C White has been suspended due to statements made by Mr White as to the authenticity of the record claim. Therefore pending the outcome of any legal action that may be taken, the record has been suspended. Until resolved the Committee will acknowledge fish above the previous record of 30lbs 12ozs, that being a fish caught by Mr T Flower at Tavistock Trout Fishery in July 1994 and consider all claims that are above the 36lbs 14ozs 8 drms fish purported to have been caught by Mr White, these will be processed in the normal way. The Committee therefore acknowledge the following claim- which has yet to be ratified:- Cultivated 33 4 0 15.082 2003 J Lawson, Watercress Trout Fishery, Devon

Cultivated game fish lists closed to further claims April 2015
